

Moon Deck Glow Path

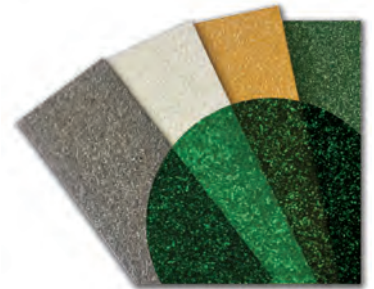

The Moon Deck Glow Path is an application of a complete high performance surface coating system over an entire concrete or asphalt pathway surface to give the ultimate visual sense of security in areas of darkness for both pedestrian and cycle ways.

The Glow Path may assist in both orientation, navigation and visual identification of potential hazards or obstruction that may be present in and areas of darkness.

The innovative components used for the Glow Path coating system are of the highest quality resin based formulations in construction, far exceeding lifespan endurance than traditional epoxy painted products.

Also meeting all current NATA certified Australian slip resistant standards AS 4586:2013 class P5 the highest standard achievable.
