COURSE OUTLINE

Overview

The Moon Deck training program consists of competencies in:

- Adhere to regulatory compliance requirements
- Comply with quality assurance standards
- Identify and comply with Moon Deck quality and specifications
- Meet all environmental considerations and expectations

This six hour course delivered over a single day aims to provide participants with the fundamental skills and knowledge necessary to plan and apply Moon Deck coatings to a variety of services in a reliable safe and trouble-free manner. Participants will focus on many different elements necessary to ensure accurate and proficient application of the Moon Deck range of products in a variety of situations.

Suitable attendees

The program is designed for anyone working in the domestic and industrial and commercial industry, including, but not limited to painters engineering and civil construction sectors. Painters who undertake coating practices will profit from better understanding and capabilities and limitations of applying various coating systems. This course can also be used effectively to educate inexperienced personnel or to update those experienced industry personnel.

The course will be delivered with special consideration given to participants level of experience and knowledge.

Learning outcomes

- Insuring correct preparation and planning of application requirements
- Proper selection of tools, equipment, and safety expectations
- Understand best practice, application of product, care and handling
- Ability to prepare site for works and isolation from public
- Knowledge of different types of materials required
- Determine the exact length of time required to apply and complete a job
- Ability to understand the scale and demands of the project and product capabilities
- Reduce waste and cleanup operations

Supplied equipment and materials

- Moon Deck will provide all tooling equipment and coatings necessary for the practical component of the training. The practical training areas of application will be conducted on panels that will be available to course attendees to take home with them as part of their product Sample panels for client and customer viewing. This will include the predominant colours and various products available in the Moon Deck range.
- All handtools and equipment
- Safety equipment supplied are disposable nitrile gloves, but encouraged attendees to bring their personal respirator masks or can be purchased or supplied additionally on the day.
- Coating materials in all Moon Deck colour range, panel labelling and product information

Assessment, outcomes and take-a-ways

- Participants are given a comprehensive, theoretical and practical training based program in order to prove their level of competence, to undertake the works
- Participants will receive certificate of attainment electronically and physically
- Participants that have completed the session will be identified as certified Moon Deck applicators with their company or business details and details on the Moon Deck website for client and customer referencing and serviceable locations
- Additionally, there will be a certified applicators portal, login for additional support and product services, including, but not limited to material safety data sheets, Product Technical Data (PTD) sheets.
- Safe work method statement templates
- Participants are encouraged to film demonstrations for future reference and reflection.
